THE SHOSHONE-PAIUTE TRIBES RESERVES THE RIGHT TO CONDUCT BACKGROUND CHECKS ON ALL NEW EMPLOYEES. In accordance with Shoshone-Paiute Tribes' Resolution No. 95-SPR-135

SPECIAL CONSIDERATIONS:

This position is subject to random drug testing and a background check as a condition of employment. This individual operates Tribal vehicles and equipment on a regular basis. This person comes into close contact with children and seniors in the course of delivering services to the community. This person works in hazardous environments (machinery, electricity, chemicals).

POSITION STATEMENT:

Under the direct supervision of the Environmental Protection Program Director, the incumbent will train and assist in the development and implementation of the Water Pollution Control Program and other environmental programs as specified under program work plans and as directed by the Environmental Protection Program Director. This is a field position and the person selected for the position can be expected to spend up to 50% time working in the field.

SPECIFIC DUTIES:

This position will require the following tasks and activities:

1. Assisting in the planning, development and implementation of a surface and ground water monitoring program which will include, but not be limited to: sampling, collection and analyses of surface and groundwater. Grant writing, reporting, budgets, and management.
2. Learning and understanding the various methods of water quality sampling and analysis including the use of field measurement instruments, sampling protocol and data quality control and assurance.
3. Collecting and preparing water quality samples for shipment to the contract laboratory including the preparation of trip blanks, spikes and duplicates as necessary. This involves the preparation of all chain of custody documents.
4. Regularly and routinely maintain field measurement instruments including instrument calibration prior to data collection events.
5. Enter all data collected from monitoring and from special studies into a water quality database, including the use of STORET, a database maintained by the U.S. Environmental Protection Agency. Generate reports from the database that reflect the character of water quality on the Duck Valley Indian Reservation.
6. As needed, research federal and state sources for water quality data pertaining to the water quality of the reservation. Appropriate sources could include BIA, BLM, USGS, USFS, BPA, and various departments of the Nevada State Government.
7. If and when requested, assist Tribal Programs by participating in their field

activities including data collection, stream restoration and projects for stream restoration or improvement, and formulating best management practices for nonpoint source pollution prevention.

8. Performs other related duties as assigned by the Tribal Environmental Protection Program.

MINIMUM QUALIFICATIONS:

1. An associate degree or two (2) years of college in a science or technical discipline (such as biology, etc.) is preferred. An applicant may substitute two (2) years of related work experience for one (1) college semester (12 weeks). However, a strong science or math background needs to be demonstrated if experience is used as an academic substitute.
2. Bachelor's degree in biology, hydrology, chemistry, natural resources. Etc.
3. Must have good math and science skills and be able to use a computer for data entry, report development and report generation.
4. Must be able to interact and effectively communicate with Tribal members and with various Tribal, Federal and State Agencies. Must exhibit quality writing and editing skills.
5. Should be in good physical condition and be able to perform rigorous field work from time to time.
6. Must have a valid Idaho or Nevada State Driver's license and be insurable with the Tribes insurance carrier.
